

Pantaron Range, Bukidnon

Address: Bukidnon

Description: While not very well known, the Pantaron mountain range in Bukidnon is a haven of biodiversity. Various species of threatened endemic fauna seek refuge within the vital watersheds that this mountain range hosts. High incidence of poverty and tenurial issues are strong influences on the lives of the indigenous Manobos or Lumads, who rely largely on the natural resources of the range.

Status: Closed

Site Profile Summary

Site Profile

Ecosystem Types	Lowland Forest
Protection Status	
Area
